

I am currently a subscriber to XM satellite radio and have been for over a year. I pay a monthly cost for this service. And I pay this cost because I could not the desired programming and the desired reception from free commercial radio stations.

I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming and reception that I deserve and am willing to pay for.

Do not take away my choice, if, in fact, I am willing to pay for it.

Instant traffic and weather should always be available to me if I wish to pay for the service.
